

## **Environmental care and ecology**

### **Benefits from steam biocleaning**

SANIVAP steam biocleaning method is totally eco-friendly on many aspects:

#### ***No use of chemical product:***

Steam ensures very efficient cleaning and disinfecting thus avoiding the use of detergent and disinfectant chemical products

#### ***No polluted reject:***

There no need to eliminate polluted reject as no chemical are used.

#### ***Reduced water consumption:***

Dry steam production requires very little water, much less than traditional method used for cleaning surfaces.

#### ***Low electricity consumption:***

The efficiency of SANIVAP steam generators enables to obtain high quality steam with minimized electric consumption.

#### ***Low noise level:***

Noise level of SANIVAP equipment is very low.

**SANIVAP steam biocleaning equipment and method totally fulfil the requirements for achieving the objectives of environmental protection.**
