

General principles to follow :

- ❶ Before the first use of any accessory, **warm up the steam hose by opening the steam outflow for 10 sec on position 6 of the steam regulation knob**, then place the microfiber cloth (for accessories using them)
- ❷ Change the microfiber cloth when necessary : as soon as it has become too wet, for each equipment...
- ❸ **Wipe with a microfiber cloth in the other hand the treated surface when using an accessory which is not fitted with a microfiber**
- ❹ Make sure to treat the surfaces using a speed for the accessory on the surfaces of around 10cm/sec

General recommendations :

- Evacuate all trashes
- Respect chronology :
 - from cleanest to the dirtiest
 - from highest to lowest
- respect all standard recommendations

Type of surfaces	Accessories used and method	Precaution
<p>Walls, vertical surfaces...</p>	<p>- use the floor MOP or 30 cm brush MOP.</p>	<p>Steam output knob position:</p> <ul style="list-style-type: none"> - floor mop : 2-3 - 30 cm brush mop : 1-2
<p>Furniture: bed, table, cupboard..... chair, door knob, interrupters, telephone...</p>	<p>- Use 30 cm brush + Mop on large surfaces.</p> <p>- Use 20 cm brush+ microfiber cloth on smaller surfaces</p> <p>- Use contact nozzle + microfiber cloth on complex surfaces (tubes, knob....)</p> <p>- Use bent nozzle for difficult access area and wipe the treated surface with a microfiber cloth</p> <p>- Use the bent nozzle + 6cm brush, for the inside basin and siphon plumbing</p>	<p>Steam output knob position:</p> <ul style="list-style-type: none"> - 30 cm brush mop : 1-2- If too much humidity - 30 cm brush mop : 1-2- If too much humidity - 30 cm brush mop : 1-2- If too much humidity - Always use bent nozzle at a distance less than 1 cm from surface - Steam output knob position: 3-4
<p>Bathroom: toilets, basin, showers...</p>	<p>- Use the bent nozzle + 6cm brush, for the inside basin and siphon plumbing</p>	<p>- Steam output knob position: 3-4</p>
<p>Floors</p>	<p>- Use the floor MOP+ microfiber MOP - 1 MOP for 8 to 12 square meters</p>	<p>- before using the steam floor MOP, a damp mopping of the floor has to be made</p> <p>- Knob position : 2 -3</p>
